GETTING STARTED

WARNING: NEVER TRY TO INSERT OR REMOVE A GAME PAK WHEN THE POWER IS ON!

- Turn the power OFF on your N64.
- Insert the Game Pak into the slot on the N64. Press firmly to lock the Game Pak in place.
- Turn the POWER switch ON. After the legal screens appear, you may go right to the game by pressing START.

CONTROLLER PAK MENU

Press and hold **START** upon powering up or reset to access the Controller Pak Menu. This will allow you to view and delete saved information from a Nintendo 64 Controller Pak.

USING THE RUMBLE PAK

Anytime you start a game, you will be prompted to insert your Rumble Pak at that time. If you are not using a Rumble Pak, press the **A** Button to move on.

REMEMBER!

It is important to switch your Rumble Pak and Controller Pak only when prompted to do so.

CONTROL STICK

The Nintendo 64 Control Stick uses an analog system to read the angles and directions of its movement. This allows precision control that is not possible using the conventional Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press **START** while holding down the **L** and **R** Buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it. If you need assistance, contact Nintendo Consumer Assistance at 1-800-255-3700 or your nearest Nintendo Authorized Repair Center.

CONTROLLER

Before you begin your game, familiarize yourself with the controls.

QUITTING A GAME IN PROGRESS

Press **START** to pause the game. The Pause Options Screen will appear. Highlight **QUIT GAME**, then press the **A** Button.

After you set up your tournament, all the teams will be allowed to enter a name for themselves. After the names have been entered, you can choose who will play who by choosing **SET MATCHUPS**. If you would like the game to choose, select **RANDOM MATCHUPS**.

If you have selected an **ODD** number of teams to participate in the tournament, one team will have a **BYE** for their first game. Your team will be highlighted but you can view the other teams by pressing **Up** or **Down** on the **Control Stick** or **Control Pad**. With **STANDINGS** you can view your team's current ranking as well as the other NFL teams. **STATISTICS** lets you know where you are in regards to **Passing**, **Rushing**, **Defense**, **Points**, etc. This is a good way of measuring your team with the rest of the league. You can scroll through the different statistics by pressing **Left** and **Right** on the **Control Stick** or **Control Pad**. You can view where other teams are in regards to statistics by pressing **Up** or **Down** on the **Control Stick** or **Control Pad**.

PLAY EDITOR

Every good team needs practice and what better way to sharpen your skills than with the **Play Editor**. Play Editor also allows you to create entirely new plays both on Offense and Defense!

To start off, choose **PLAY EDITOR** from the Main Menu. Once you have accessed Play Editor, you will be asked for your **name**, **PIN** and what **Controller Pak** your saved information is on. If you do not have any saved information, a new file will be created for you.

MAIN MENU (PLAY EDITOR): After you have accessed or saved a file, you will enter the Play Editor menu. You have numerous choices available to you:

TEAMS: Choose what team you would like to create plays for.

OFFENSE: Create or Edit plays for your Offense.

DEFENSE: Create or Edit plays for your Defense.

MAINTENANCE: Copy and Clear your Offensive and Defensive plays.

PLAYBOOK: Customize the existing **NFL Blitz 2000 Playbook!** Customize all three Offensive pages of the playbook, the Defensive page and set Audibles for your team!

SAVE PLAYS: Save your plays to your Controller Pak here.

SAVE / EXIT: Exit Play Editor and save your data as well.

USING THE PLAY EDITOR: Using the Play Editor is a great way to improve your team's skills on the field. Create entirely new plays to crush your opponent. Before you can start, you need to save your data to a Controller Pak (see above). The following pages will give you instructions on how to **Create** your own plays and **Customize** your playbook!

PLAY EDITOR

EDITING OFFENSIVE PLAYS: Select **OFFENSE** from the Play Editor menu and press the **A Button**. You will notice nine blocks on the right of the screen. If you have no saved playbook data you must create some. If you are just starting your playbook, the option **CREATE / EDIT** will only be available. Press the **A Button** at this option to continue. Next you can select which of the nine blocks you want to be your new play. Select one and press the **A Button**. The rest of the menu options will now be available.

PLAY TYPE: Normal and Fake Punt. Choose which type of play you want this to be.

EDIT ROUTES: Control each player on your offense. For information on moving each player, see below.

PREVIEW: Run your play on the practice field without a defense!

PRACTICE: Set your Line of Scrimmage (**LOS**), pick the **Defense's** play and Run your play against the defense.

NAME PLAY: After you are satisfied with your created play...name it!

MAIN MENU: This will take you back to the Play Editor menu.

EDITING DEFENSIVE PLAYS: If you select **DEFENSE** from the Play Editor menu you will find the options are basically the same. **PLAY TYPE** lets you choose from a **Normal** defensive play or a **Blitz!** **FORMATION** refers to how you want your defense to be set up on the field. Select from the six choices and press the **A Button**. **PRACTICE** works the same as it does for plays on offense. You can also name your defensive plays as well. Just like the offensive plays, you can edit the assignments of your defensive players. More information on editing assignments is available on the following page.

PLAY EDITOR

EDITING PLAYER MOVEMENT: When you are creating an Offensive or Defensive play, select what type of play it will be and then choose **EDIT ROUTES**. Every player on your offense or defense will be controllable. Highlight each player by pressing **Up** or **Down** on the **Control Stick** or **Control Pad** and select them by pressing the **A Button**. Move the player on the field with the **Control Stick** or **Control Pad**.

OFFENSIVE MOVEMENTS: On offense you can change the movements of seven people. Select a player and press the **A Button**. Move your three Receivers along the LOS and down the field using the **Control Stick** or **Control Pad**. When you press the **A Button** a screen will become available with different moves your player can perform. Select which move you want the player to do and press the **A Button**.

For example, you can have your player run straight, spin, cut to the side and then Turbo to the end zone. Your **Quarterback** can either stand in a **Regular Set** or a **Shotgun** position. Your **Linemen** can be moved along the LOS and either **Block** to the **Left** or **Right**.

DEFENSIVE MOVEMENTS: Defensive assignments work in the same way as Offensive movements. First select what **Formation** your defense will be in. This will determine whether you have **Four** or **Five** Defensive Backs on the field. Select a player and press the **A Button**. Next select where that player will be and what action they will be performing (**Man 2 Man** coverage, **Zone** coverage or **Rush**). After you are set, select **Return** and press the **A Button** to return to the **Play Editor: Defense** menu. The menu works the same as in **Offense**. You can now **Name** your play, **Practice** your play against an offense and return to the **Play Editor** main menu and **Save** it.

PLAY EDITOR

MAINTENANCE: If you select **MAINTENANCE** from the **Play Editor** menu, you will have three choices: **Copy Play**, **Clear Play & Main Menu**. **Copy Play** allows you to copy an **Offensive** or **Defensive** play to your nine slot playbook. **Clear Play** lets you erase existing plays in your custom playbook to free up space for new plays. **Main Menu** will take you back to the previous menu screen.

EDITING THE PLAYBOOK: Select **PLAYBOOK** from the **Play Editor** menu. You are now able to configure the game's playbook. Select from the three **Offensive** playbook pages, the **Defensive** page or set your **Audibles**. Select what page you would like to edit. Press the **A Button** to access that page. Move the **Control Stick** or **Control Pad** to the play you wish to replace and press the **A Button**. A small window will appear showing all the plays that are available to you. You can scroll through each one by pressing **Up** or **Down** on the **Control Stick** or **Control Pad**. Once you have selected a play you wish to place in that slot, press the **A Button**. The same is done for the defensive page.

SETTING AUDIBLES: An **AUDIBLE** is when a play is changed at the **Line of Scrimmage**. This is great when you notice that you've called the wrong play and you are about to pay for it. Select **PLAYBOOK** from the **Play Editor** menu and then select **SET AUDIBLES**. Next select from **Offense** or **Defense**. The **Down C Button** is used to call your audibles during the game. Select from **Audible 1**, **2** or **3** and press the **A Button**. Next select what play you want to correspond with that Audible. When you are finished, exit back to the **Main Menu** and save your game configurations.

During the game, you can call an audible by holding the **Down C Button** and pressing **Left** or **Right** on the **Control Stick** or **Control Pad** to choose your offensive or defensive audible. Do this at the **LOS** before the play begins. Release the **Down C Button** to activate the audible.

PLAYING THE GAME

Now that you've learned how to navigate through the different menus and options in NFL Blitz 2000, it's time to learn how to play!

CODE ENTERING: A great feature in the game is the ability to enter secret codes before the game. These are accomplished by pressing your gameplay buttons (the default settings are the **Z**, **B** and **A** Buttons) to cycle through different icons on the bottom of the screen. Once your icon sequence has been entered, move the **Control Stick** or **Control Pad** in a specific direction for that code to work. If you've done everything correctly, you'll hear a sound and the correct code's name will flash above your icons. The codes must be entered at the **Match-Up** screen quickly because you only have a few seconds to enter as many as you can! Each player may enter codes under his/her own icon bar.

Player 1

Player 2

Player 3

Player 4

BLITZ PASSING: Blitz Passing is accomplished by pressing the **Up**, **Left** & **Right C Buttons** during a play. For example, if you want to pass quickly to your Receiver on the left, press the **Left C Button**. The **Up C Button** corresponds to the receiver in the center of the field. The **Right C Button** corresponds to the receiver on the right. If you run a crossing play (where your receivers cross each other down the field), the button will still correspond with the original receiver. So if your player starts on the left and goes to the right, press the **Left C Button** to pass!

PLAYING THE GAME

PLAYER CONTROL: NFL Blitz 2000 allows you play with up to four players. If you are playing a **four player game**, the teams are split into **two players per team**. On **Offense** or **Defense**, two players can put their skills together to punish their opposition. On **Offense**, one of the players is the **Quarterback**, while the other player is set as a **Receiver** without any specific play pattern to follow. On **Defense**, you can have one player rush the QB or just hang back with the other player to ensure no progress is made by the Offense. Each player will have an icon above them with their player number to show their location on the field. Each player's **TURBO METER** is located on the bottom of the screen.

Players 1 & 3

Players 2 & 4

Players TURBO Meters

YOU'RE ON FIRE! NFL Blitz 2000 also allows your team to be set ablaze if you're doing well enough. Your entire team will release a puff of smoke at the LOS. Whether you are on **Offense** or **Defense**, your team will be even tougher to stop. You will notice increased speed and power, but if you don't keep up the good work your flame will go out! Your team is set "**On Fire**" when you have one receiver successfully catch three passes in row on **Offense** or your **Defense** sacks the QB twice in a row.
